

# Council Infrastructure Impacted by High River

Renmark Paringa  
Council

The River Murray peaked on 26 December 2023 and reached AHD level of 18.55. As assets and infrastructure become visible due to the AHD level decreasing, Council is undertaking routine inspections of our road network and Riverfront infrastructure. Council will need to access and complete an assessment to ensure they are safe for reopening and use.

Please see below listing for impacted closed infrastructure:
